

# Climate Solutions for the Eurobodalla

Recommendations from Community Forum 8 May 2021

“Climate change is real,  
it’s here, and it’s a threat to  
the safety and prosperity of  
our beautiful Shire”

Forum Organiser

Jack Egan lost his North Rosedale home in the horrific fires of December, 2019.

Since then, he's quit his job to work full time towards climate action, and that came to a head in Batemans Bay on Saturday at the Climate Solutions for The Eurobodalla Forum.

Before the forum, Mr Egan told the Bay Post he saw climate change similar to a "surfing thing".

"We'd like to see the Eurobodalla well placed to catch the wave of climate change, and show the rest of Australia just how well we can ride it into a better and fairer future for all of us," he said.

# About the Forum

- **Organisers** - The Climate Action for Eurobodalla Forum (CA4E) was a resolutely non-profit, non-partisan initiative, hosted by the South Coast Health and Sustainability Alliance (SHASA) working with local groups and businesses.
- **Intentions** – Organisers said “taking practical action now will position the Eurobodalla to respond effectively to the challenges ahead”.
- **Attendance** – Well over 120 people registered to attend. On the day, around 100 people attended.
- **Objectives** - A small working group will prepare questions for all candidates for local election and will publicise their responses. All voters should be confident that the candidates they support share their commitment to climate action. Individuals and Community organisations will take forward actions within their remit.

# The process

*This report endeavours to capture the harvest from the conversations, the online data and the 'butchers paper' into a resource for ongoing action.*

*We welcome any feedback...*

- The Forum was designed and facilitated to engage community members in a democratic, solutions focused conversation that recognised and harnessed the expertise, knowledge and passion of participants.
- Participants self selected from one of ten topics, developed from community input.
- Topic hosts facilitated small group conversations that explored and responded to a series of structured questions.
  - *Why is the 'topic' important?*
  - *What are possible solutions to the challenges it presents?*
  - *What are the top solutions?*
- A final plenary session brought together all ten topic tables in a sharing of ideas and actions.

# The outcomes

- A community conversation that identified key climate solutions for the Eurobodalla.
- To discuss, identify and document key solutions for each topic area.
- To provide community input into relevant questions to be put to all Council Election candidates.
- To develop next steps for ongoing action.

---

*"Small groups of people can change the world. In fact, they are the only ones who ever have."  
Margaret Mead*

# Media Coverage

## Climate change on the agenda at community forum Joel Erickson Local News

# Topics: Action Focus

## 1. CLIMATE SOLUTIONS 4 EUROBODALLA

[Agriculture](#)

[Built Environment and Planning](#)

[Business & Tourism](#)

[Coastal Management & Marine Habitat](#)

[Cultural & Purposeful Burning](#)

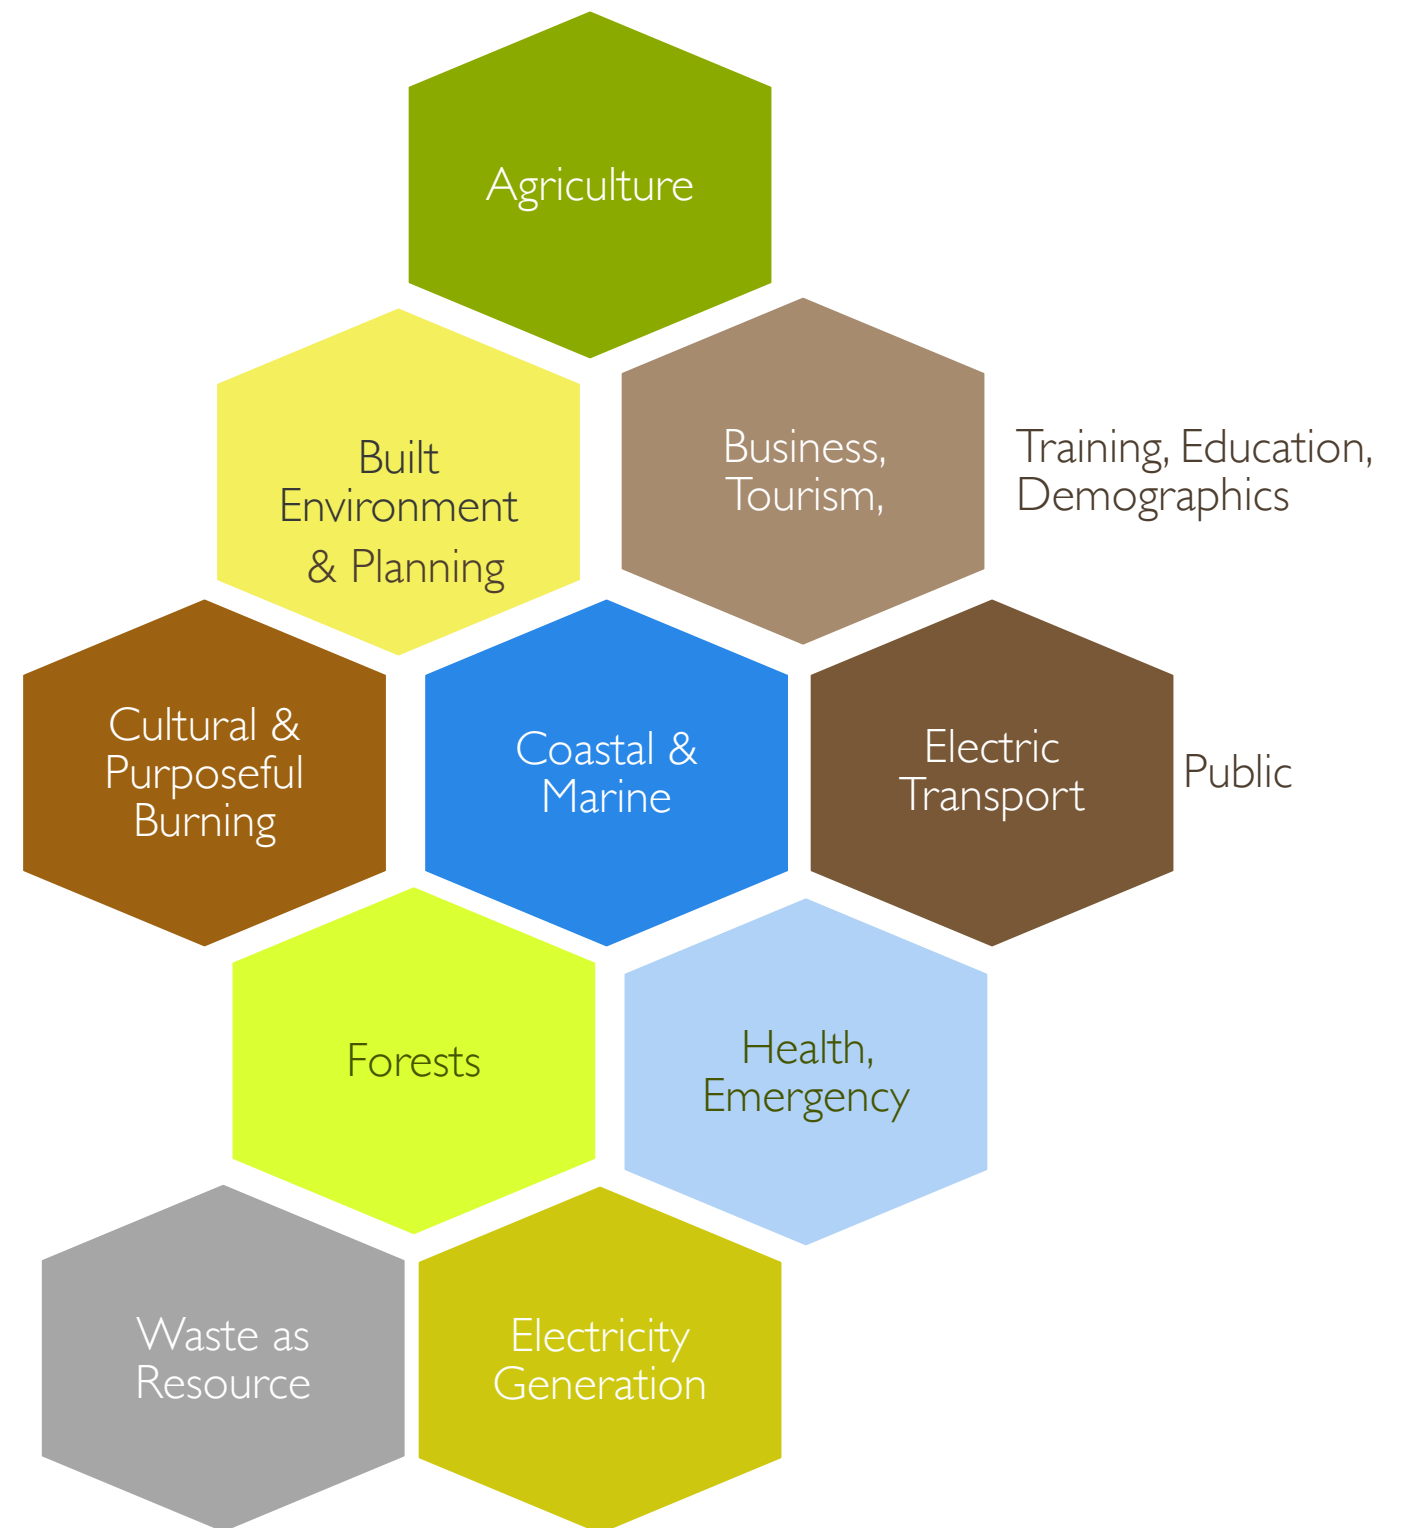

[Electric Transport](#)

[Forests](#)

[Health & Emergency Management](#)

[Local electricity generation](#)

[Waste as a resource](#)

# Agriculture and Food Production

- Educate and Communicate – schools, internships, promotions, promote scientific results to ag businesses. Promote farm tourism/study opportunities.
- Plan to include agriculture not build over it – planning consultation, policies to protect viable farms, promote green agriculture. Ensure agriculture is on-side with environment
- Work to cut farming sector emissions – livestock, transport, processing.

[This Photo](#) by Unknown Author is licensed under [CC BY-NC-ND](#)

## Questions: Agriculture and Food Production

- What would you do to help local producers have access to the latest research relevant to their businesses?
- How would you promote farm tourism? How about Educational opportunities for schools around food production?
- How would you resolve tensions between ag. Producers, ag landholders and further residential development in the shire?
- What would you do to promote reducing emissions in ag/fisheries production in the shire?

# The Agriculture Table

## WHY IMPORTANT?

- PEOPLE STRUGGLING TO LIVE IN NEW ENVIRONMENT
- A COMMUNITY RESILIENCE
- B/FIRE EMERG. RESPONSE POOR / COMMUNICATION <sup>GPS UNABLE TO LINK IN SYSTEM</sup>
- CONTRIBUTE TO NEW HEALTH FACILITY STANDARDS
- WE NEED TO CHANGE POS FOR ALL
- PAUCITY OF LOCAL DATA / ENVIRONMENTAL INFLUENCE  
→ GVT. INT
- CRITICAL INCIDENTS AFTER TRAUMA
- GRABING UNDER AGENCIES INDIVIDUAL REQ → SIMPLIFY
- DETERMINANTS OF HEALTH — CLIMATE CHANGE MULTIPLE
- HEALTH ISSUES — HEALTH THE PRIME <sup>WATER BORN DISEASE</sup>
- HOW TO — FEED, HOUSE, EDUCATE COMM IN C/K. <sup>AIR POLLUTION</sup>
- AT-RISK COMMUNITIES — RISING WATER LEVEL <sup>DRUG + ALCOHOL USE</sup>
- ANUTRITION, PHYS. EX. & IN EMERGENCIES
- STRAIN ON COUNSELLING SERVICES — NEED A COORDINATED BOTTOM UP APPROACH
- THERE ARE BLUEPRINTS FOR CARING FOR EACH OTHER (NEED TO BE REPLICATED)
- COMMON DIRECTION FOR MOVING FORWARD — POSITIVE KEY MESSAGES

## SOLUTIONS!

- STREAMLINE COM. BETWEEN AFFECTED / RESPONSE GROUPS
- IDENTIFY KEY PEOPLE / AGENCIES
- TAP INTO LOCAL WISDOM / KNOWLEDGE OF COMMUNITIES
- CIVIL DEFENSE / HUMAN ORGANISATION / STRATEGIES  
YACMING + BRINGING PEOPLE TOGETHER  
→ LINK 2 FORMAL AGENCIES
- BUSHFIRE PLAN ADDED + EXPANDED TO STREET OR VILLAGE PLAN (STREET MOVEMENT)
- \* DEVELOP A PILOT SCHEME FOR DISASTER / EXTREME EVENT  
LINK 2 SURF CLUB COMMUNICATION CAPACITY  
GENERATORS / AIR FILTERS / REFRIGERATION  
BABY FRIENDLY / CONSIDERATION BREAST FEEDING  
AGED / DISABLED FRESH WATER
- REACT TO WHERE EMERGENCIES OCCUR — GATHER SUPPORTIVE PEOPLE
- SECURE POWER FOR VACCINE SECURITY VENTILATORS
- HAVE INTERCONNECTED COMMUNITIES. <sup>INCREASE</sup>

## TDP 3!

LOCAL THE NEW GLOBAL!

- WHAT IF EUROBODALLA BECAME A SELF-SUST COMMUNITY <sup>SOLAR GRIDS / INTEGRATE</sup>
- UTILISE PUBLIC SPACE & SOLAR COVERED SHADE
- THAILER — MOBILE PHONE TOWERS (COMM) <sup>capacity</sup>
- PILOT SCHEME — STREET LEVEL ORGANISATION
- LOCAL FOOD / EXERCISE / INTEGRATED HEALTH
- SUSTAINABLE HEALTH CARE FOR EUROBODALLA
- Social sustainability

## PLANNING FOR LOCAL AG.

URBAN ENCROACHMENT ON AG. LAND  
ALL ALONG THE COAST.

- VALUING AG LAND FOR <sup>water</sup> FOOD PRODUCTION
- REVIEW OF RURAL LANDS STUDY & TRANSPARENT COMMUNITY CONSULTATION - <sup>climate action</sup>

ADDRESS ENERGY SECURITY.

ON OF WATERWAYS

MUST HAVE LIMITS TO GROWTH.  
S?

## DISCUSSION

### AGRICULTURE (WHAT'S IMPORTANT IN CLIMATE ACTION)

- Food Miles - We need to EAT
- Protecting the environment
- What are the agricultural activities that can be regenerative?

- Farming contributes about 23-29% greenhouse gases in OZ.
- Farming can capture carbon.

- Farming has huge potential for carbon sequestration.  
- because it has the capacity to ADAPT.
- Farmers are problem solvers.
- Farmers need a carbon price
- What is important - our grandchildren.
- Water Management.

\* Urban encroachment on ag. land all along the coast.

\* Rural / Urban divide on outcomes of agricultural activities  
• Complex Bio-region opportunities for diverse ag.

## SOLUTIONS

### AGRICULTURE C.

1. How to cut farming emissions?
  - higher rainfall = greater sequestration options.
  - more R&D needed - eg sea weed
  - price for CARBON will drive innovation.
  - sustainable energy on farm & processing
  - turn all organic 'waste' into fertiliser.
  - more on farm training
  - new carbon measuring/monitoring

## SOLUTIONS

### EDUCATION + COMMUNICATION RURAL/URBAN GAP

- Education consumers about farming.  
→ leads to better policies for climate action.
- Partnerships between schools & farms/farmers
- Paid internships on farm.
- Evidence based policy & action.
- Seed changers can help with connection between consumers and farmers to inform policy/strategy & planning

## Planning and Built Environment

- ESC Sustainable Building advisory service
- Sustainable Green Connections – street tree planting, community streetscapes, common land solar capture,
- Planning code and building rules that embed sustainable design.
- Planning education across interested parties, prior to approval/construction.

# Talking about Planning and Built Environment

"We've got thousands of new subdivisions approved with hundreds of new houses being built, and we should be building those as sustainably as possible.

"Most people want an efficient car or phone, but they don't often realise they can have an efficient house as well."

Mr Dolphin said he'd like to see the council put more effort into educating potential homebuilders about sustainable housing.

"In the Eurobodalla, we spend about \$60 million on electricity every year," he said.

"You could give each household an extra \$2500 a year (with sustainable housing) by saving on their heating and cooling costs.

"Good housing reduces the need for hospitals, it improves mental health, and it reduces the bills."

*Paul Dolphin quoted in The Bay Post online*

# Questions: Planning and Built Environment

- Will you establish an ESC Sustainable Building advisory service, with the aim of maximising sustainability and resilience across all ESC communities?
- Will you embed sustainable town initiatives such as Green Connections – street tree planting, community streetscapes, common land solar capture, in all Council planning processes?
- Will you support updating the Planning code and building rules to ensure that they embed sustainable design principles?
- Will you review the ESC Local Environment Plan and put back in place protections for native vegetation on private land and concentrate new housing in the town centres?
- Will you ensure Council funds the planting of street trees along the verges of all urban streets and shopping centres?
- Will you ensure the Council employs a sustainable design expert to interact with house owners before their build to ensure sustainable/low energy use design? Will you fund Planning education across interested parties, prior to approval/construction?

[This Photo](#) by Unknown Author is licensed under [CC BY-SA](#)

## Business, Tourism, Employment, Education, Training

- Integrated approach to skills development in the region. Encourage cooperation between town centres rather than competition. Enviro Tourism
- Concentrate population in town centres wherever possible. Green, shared transport friendly towns, excellent access to nature.
- Seize the opportunities offered by electric vehicles and encourage businesses to adopt and support them e.g. charging points maps signage.

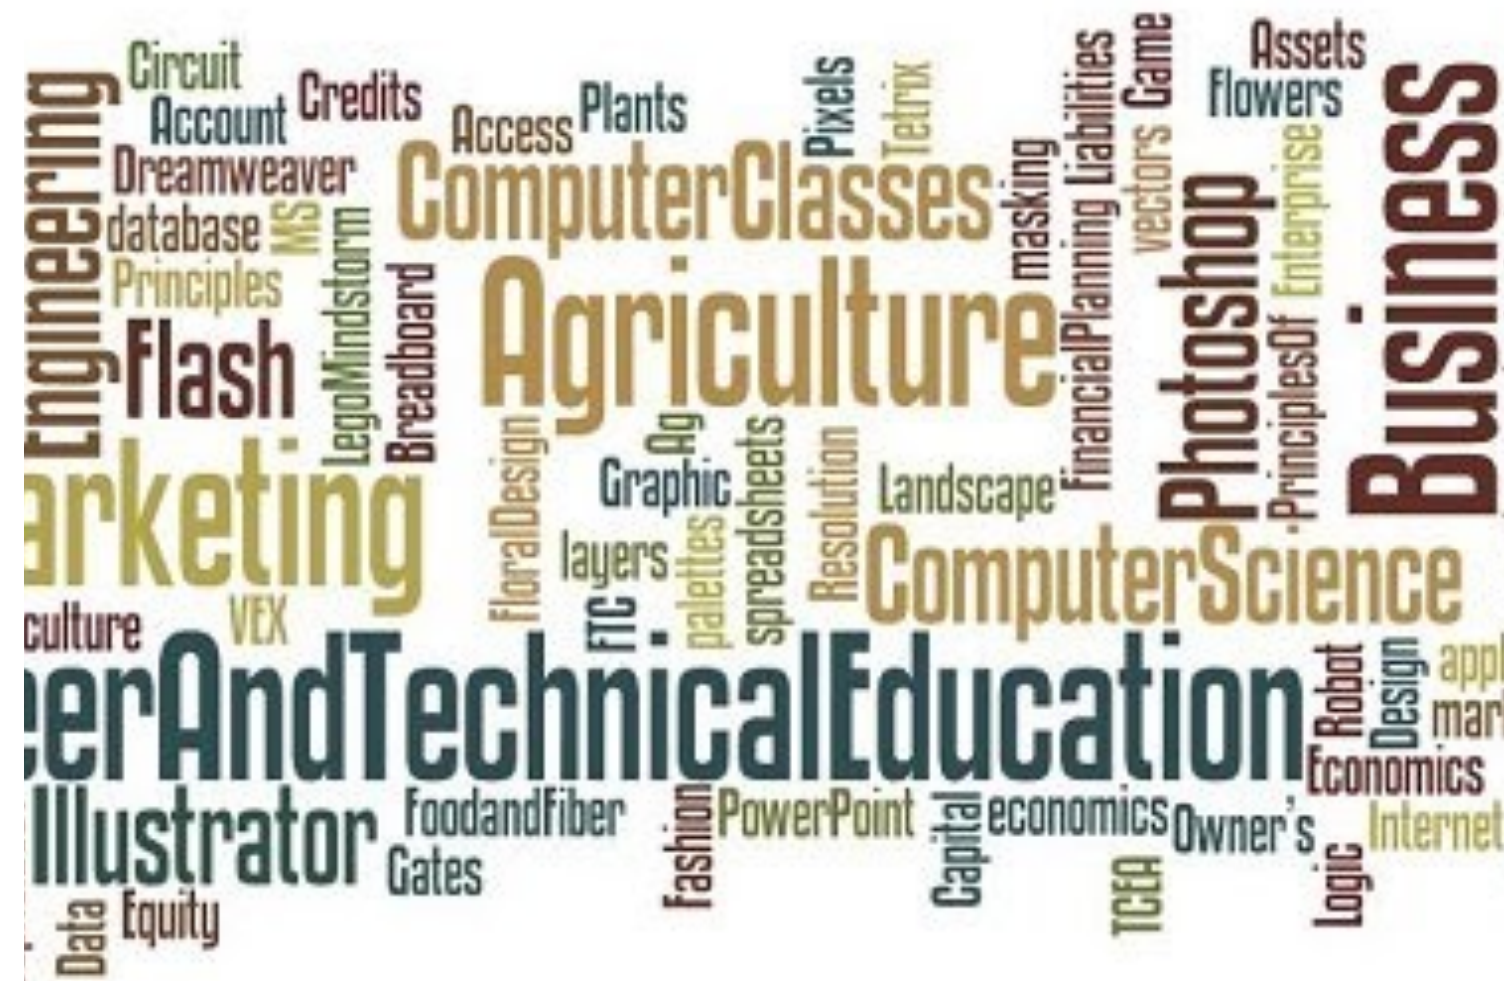

# Business, Tourism, Employment, Education, Training

- Property developers, Landowners
- Chambers of Commerce
- Local Large Business
- TAFE
- C'wealth Dept Education
- State Dept Education
- Council

# Questions: Business, Tourism, Employment, Education, Training

- How would you encourage cooperation between town centres?
- Do you see a role for Environmental Tourism in this region? How would you encourage it? How would you promote it?
- Do you agree that the Eurobodalla needs to concentrate population in the town centres? How would you ensure that town dwellers have green, shared-transport-friendly towns, and retain excellent access to nature.
- Would you be prepared to seize the opportunities offered by electric vehicles and encourage businesses to adopt and support them e.g. charging points maps signage.

[This Photo](#) by Unknown Author is licensed under [CC BY-SA](#)

## Coastal and Marine Environment

- Sanctuary Zones – increase and protect to support resilience
- LEP for Blue Carbon, following consultation
- Increased collaboration, consultation and cooperation between Council and interested parties on Coastal Management Plan and program

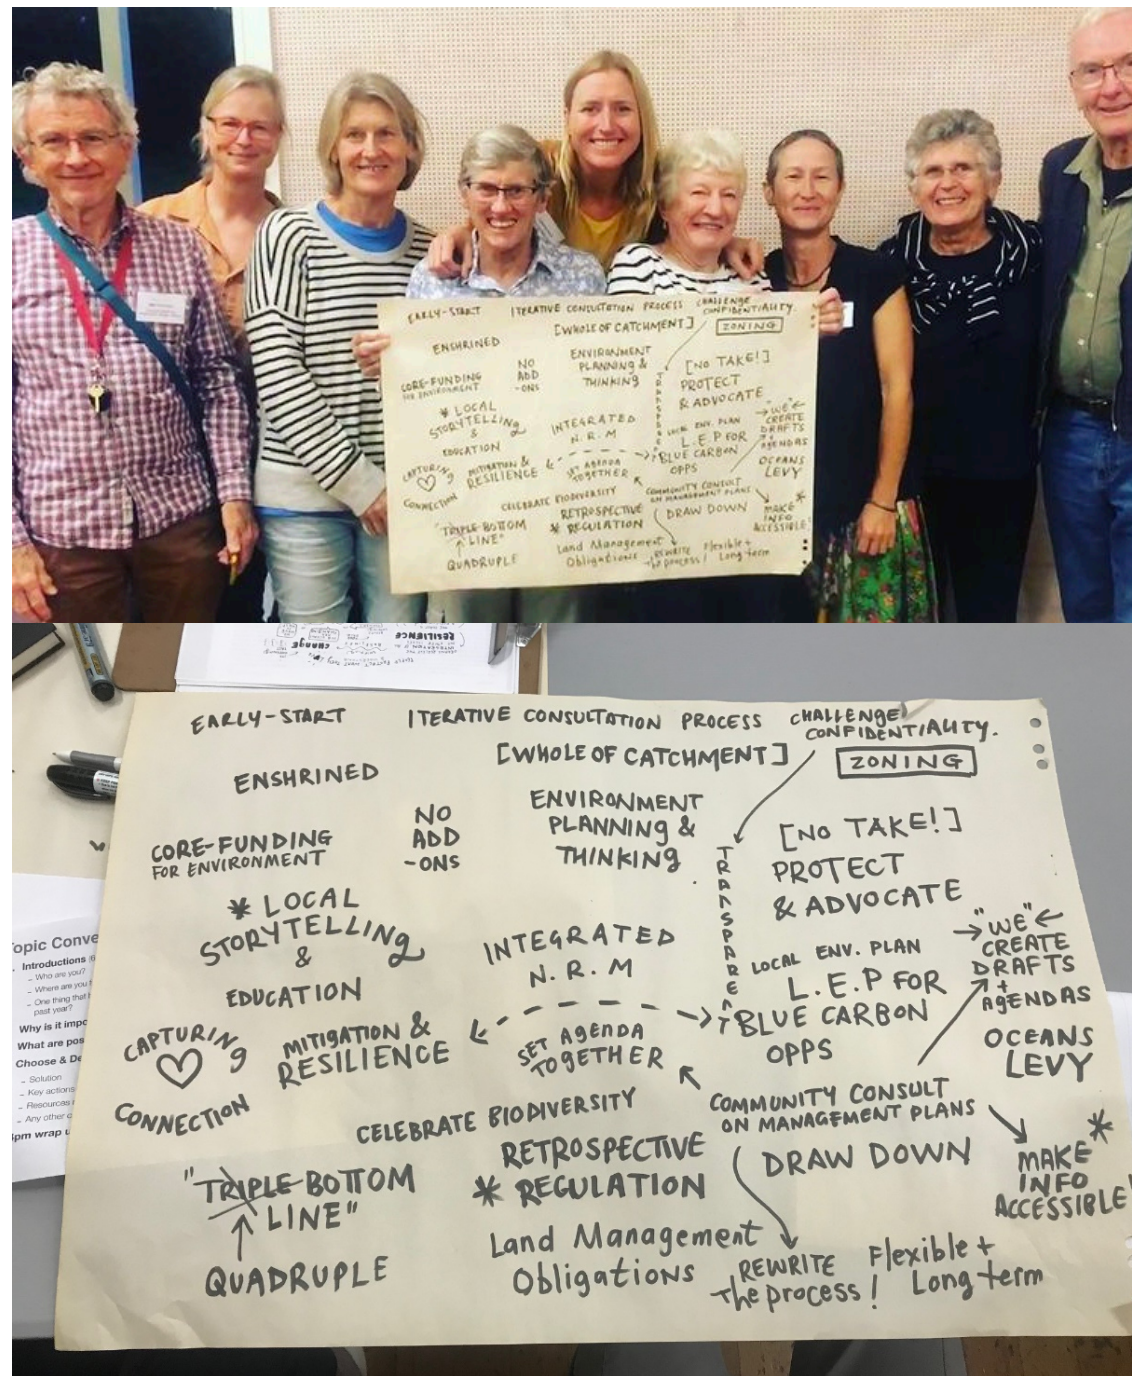

# Discussing Marine and Coastal issues

# Questions: Coastal and Marine Environment

- How would you go about educating the community about coastal and marine management?
- Would you support a Coastal Information trail? Coastal studies in local schools?
- How would you resolve conflicts between business and environmental protectors?
- How would you estimate the value of the coastal and marine environment to the Eurobodalla Shire?

# Cultural and Purposeful Burning

- Strive to understand Cultural thinking about fire, based on detailed understanding of country, within a long time frame
- Understand and share the ways in which different authorities could interact to manage country better
- Work with RFS, Forestry industry, Parks, Wildlife, traditional owners and managers, ranger service, carbon capture, planning for different climate scenarios.

# Cultural and Purposeful Burning

Magella Blinksell is working on a blog that will give people directly affected by the fires the chance to tell their stories.

"After going through such a torrid and life-changing time on the Coast, I really wanted to think about some local solutions," she said.

"It turned out to be really refreshing to sit down with our amazing community to come up with some great practical solutions.

"We've stared extreme weather events in the face, and we've seen what those changes are doing locally."

Ms Blinksell said one thing she would like to better utilised is the practice of cultural burnings in the cooler months.

"I'd love for cleaner, renewable energies to be the everyday normal in the Eurobodalla to help keep us safer, to give us better jobs and a thriving local economy, and as we face more extreme weather events," she said.

Participants were split into groups to propose climate solutions in ten key areas.

"I'd also like to see our amazing Nature Coast protected through best management of biodiversity, marine worlds and forests, which would safeguard our own safety.

"One path forward in this is through Yuin cultural burn practitioners being given the support they need to get local country back into shape through more integrated land management plans and council support.

"These priorities would equip us for 2031 and would help our community and rich nature right now."

[This Photo](#) by Unknown Author is licensed under [CC BY-SA](#)

## Questions: Cultural & Purposeful Burning

- Will you undertake to listen to Cultural thinking about fire, and work with the local traditional owners to develop a detailed framework for consultation and practical action?
- Will you engage council to research and communicate the ways in which different authorities could interact in Eurobodalla to manage country better
- Will you engage Council to work with RFS, Forestry industry, Parks, Wildlife, traditional owners and managers, ranger service, carbon capture, planning for different climate scenarios, and communicate the outcomes?

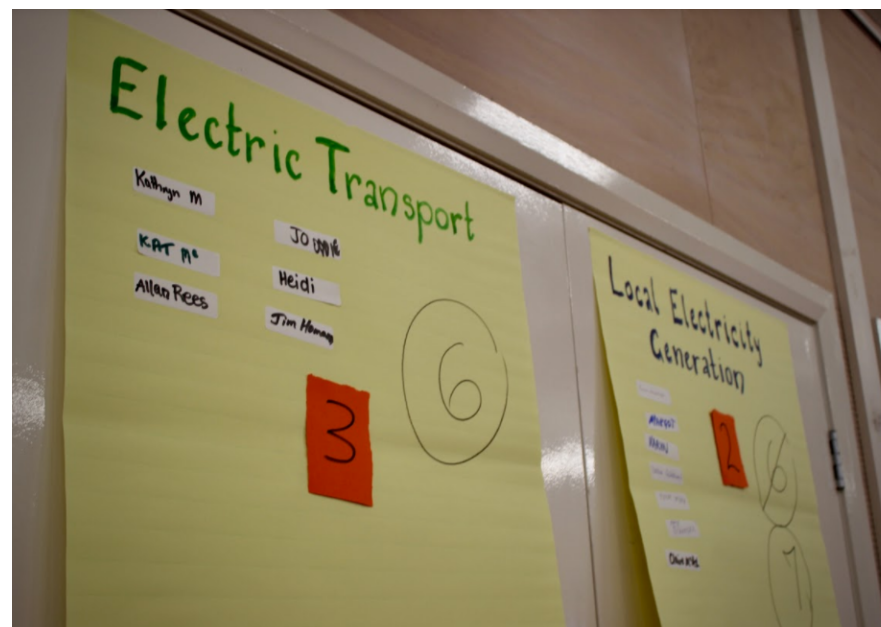

# Electric Transport

- Build a safe transport system that supports increased use of electric bikes- bigger shoulders on roads, better path network, signage
- Accelerate transition to electric vehicles

[This Photo](#) by Unknown Author is licensed under [CC BY-SA](#)

# Electric Transport

# Questions: Transport

[This Photo](#) by Unknown Author is licensed under [CC BY-SA](#)

- Will you shift the Council fleet to electric vehicles in the next 2 years?
- Will you commit to replacing Eurobodalla Pathways Strategy 2017 with a plan that commits to a 500% increase in bicycle paths by 2025?
- Will you ensure the Council installs public Electric Vehicle (EV) charges at all Council libraries, community halls and Council owned carpark?
- Will you reduce the speed limit to a maximum of 50 km/h in urban areas and 70km/h on outer regions, eg George Bass Drive between Tomakin and Broulee, to increase safety for cyclists and pedestrians?
- Will you complete the cycle path (on one side of the road to reduce crossings) from Moruya to Moruya Heads and Moruya to Broulee/Mossy Point?
- Will you prioritise funding for cycle paths of 10km radius around each town centre to make it safer for bicycles and electric bicycles?

# Energy

- Panels – make these mandatory on new construction, additional capacity from industrial buildings, spare land, carparks
- Targets and Planning – agree on a Zero Emissions target from 2022
- Hubs – Map requirements, assess and identify best places for hubs

[This Photo](#) by Unknown Author is licensed under [CC BY-NC](#)

# Local Generation of Electricity

[This Photo](#) by Unknown Author is licensed under [CC BY](#)

## Questions: Energy

- Will you commit to installing solar carpark shade structures at public carparks including Batemans Bay, Mogo and Moruya?
- Will you commit to Council setting a target of net zero emissions for all of the Eurobodalla (not just Council) by 2030?

# Emergency Management and Health

[This Photo](#) by Unknown Author is licensed under [CC BY-NC-ND](#)

- Increase redundancy in power and communication supply, localise generation
- Local level Civil Response units
- Sustainable Health response to Heat, including Mental Health response
- Make new Hospital a beacon of sustainable health design, “beacon of local resilience”

# Emergency Management and Health

# Questions: Emergency Management & Health

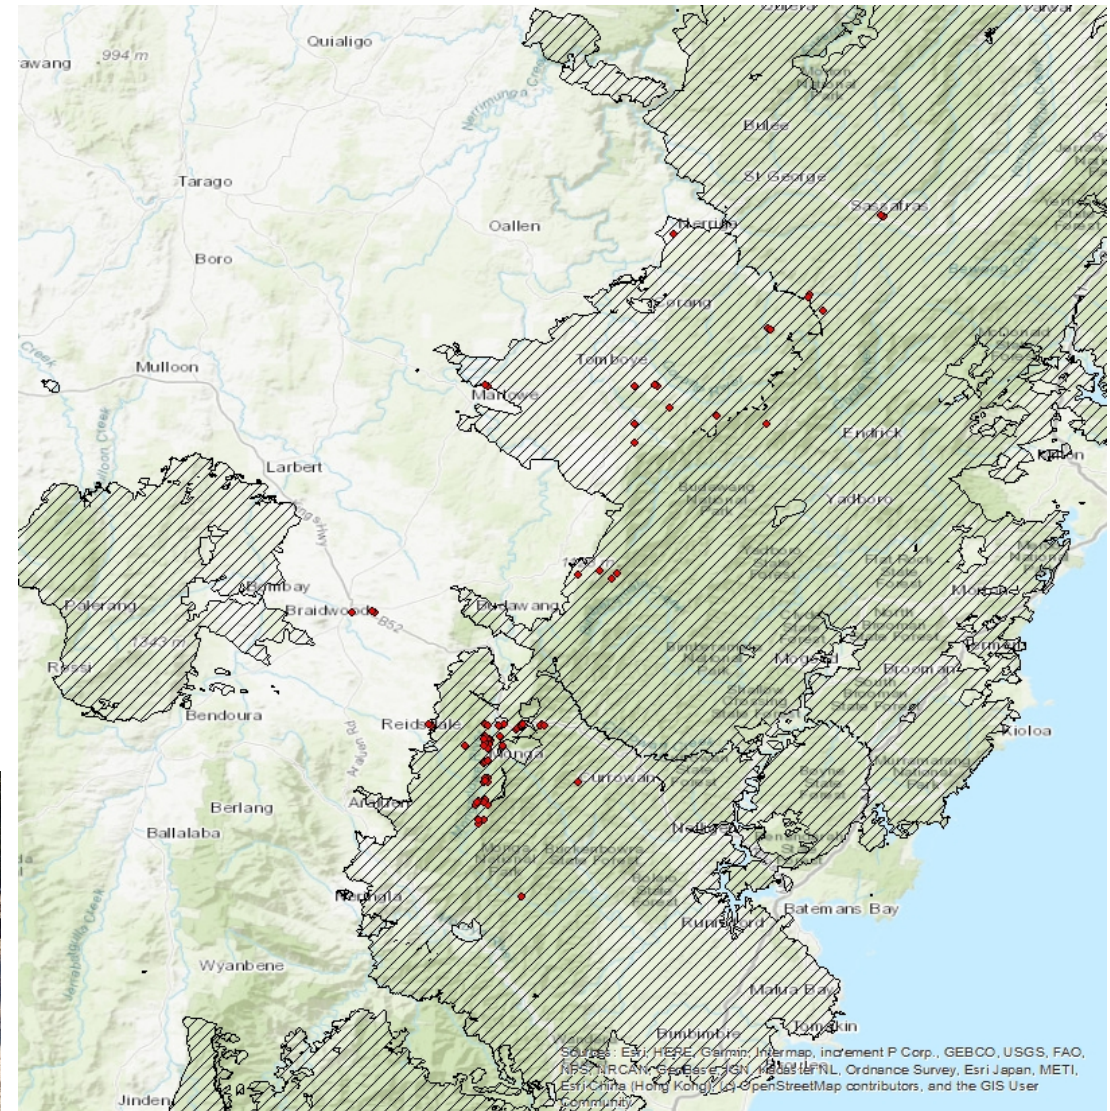

[This Photo](#) by Unknown Author is licensed under [CC BY-NC-ND](#)

- Will you partner with community group SHASA to build heatwave and bushfire havens in each town to protect the more vulnerable?
- Will you work to bring together the various parties responsible for emergency management and build local groups that can lead disaster repair/preparedness?
- Will you seek additional funding for mental health services in the region, with particular emphasis on PTSD and long-term support?
- Will you make a sustained effort to involve the whole community in planning for Moruya's new Health centre, and ensure that sustainability is a key criterion for the design?

# Forest

- End logging of native forest in Eurobodalla
- Reduce impact of Urban and Rural development on environment and biodiversity
- Improve integrity of biodiversity/carbon offsets

[This Photo](#) by Unknown Author is licensed under [CC BY](#)

# Questions: Forest

[This Photo](#) by Unknown Author is licensed under [CC BY](#)

- Will you do everything you can to limit tree loss in the Eurobodalla?
- Will you oppose logging of native forest?
- Will you support transition of timber getting from existing forest to rate-paying plantations, without clearing native forests to make plantations?
- Will you commit to limiting the expansion of new human settlements in bush?
- Will you apply additional resources to inspectors to allow them to prevent 'oops' destruction of significant trees and bio diversity
- Will you support wide community education on living with trees in a bushfire prone area?

[This Photo](#) by Unknown Author is licensed under [CC BY-SA](#)

## Waste

- Restore, expand and promote the waste resource program, including the Tip Shop?
- Provide education on waste re-use, sustainable building, etc, through Council channels?
- Close the loop building design – encourage greater use of recycled/ recyclable components in new builds and renovations.

# Actions on Waste Management

- Tools Library:
  - Hard Waste to Landfill
  - Tangarua - Marine Debris.
  - Resource Hub: Educational Facility

Org Waste  
Separating  
Limit Consum  
Footprint  
Take 3 for the  
Sea

## Eurobodalla Actions

1. Council Facilitate Share Waste App. - Virtual Tip Shop.
2. Resource Hub - Educational Facility
3. Close Loop Building Design

- Waste: Burden on Community
- Resource: Not utilised
- Some waste Stockpiled & Stored
- Infant Market
- #Consumer Education Need
- Sorting Issue
- Composting - Food Organic  
Garden Organic.
- Formalise current informal Waste Exchanges
- Stop Producing Methane
- Re Makery at Tips.
- Minimize Construction Waste  
(appropriate Pricing)

## Questions: Waste

- Will you join 43 other NSW Councils and adopt FOGO (food organics and garden organics) recycling asap to reduce residential waste to landfill by 40%?
- Will you restore, expand and promote the waste resource program, including the Tip Shop?
- Will you provide education on waste re-use, sustainable building, etc, through Council channels?
- Will you work on safe ways to encourage greater use of recycled/ recyclable components in new builds and renovations.

# Community at work

# The rest of the Iceberg

- What about the suggestions that didn't make it into the top three for each table? Some of those were worth following up also.
- iMEET! online forum - register at <http://imeet.com.au/register:toy?key=17626239>
- You can always return to the iMEET! site to find out what was captured at the Forum
- Reach out through the iMEET! marketplace to offer help or ask for it – there are already some requests and offers there
- Other useful actions and resources - we are open to suggestions and offers of help

# The Network of Community Action

- Community organisations and the actions they take responsibility for.
- SHASA, the Eurobodalla Shire Council, 350 Eurobodalla, Repower Shoalhaven, ZeroSE Community, the Eurobodalla Natural History Society, Birds Australia, Bushfire Survivors for Climate Action, Coast Watchers, the Nature Coast Marine Group, Eurobodalla Walkers, Farmers for Climate, NSW Farmers, Landcare, Borrowed Ground Market Garden, Australian Parents for Climate Action, Climate and Health Alliance, Nature.net.au, the Australian Conservation Foundation, With Our Own Eyes Eurobodalla, South Coast Region Conservation Alliance, Sustaining All Life, Climate Action Monaro, the Australian Plant Society, SAGE, Refugee Action Collective Eurobodalla, Extinction Rebellion and Sportfirst Moruya. Businesses included both the Moruya and Batemans Bay Chambers of Commerce, CANSign, Global Learning, the Surf Beach Surgery, and Southern Phone. The Greens and the Australian Labor Party also attended.

# The Network of Community Action – which organisations for which actions?

- SHASA – Electric transport, solar bulk buy, repair café. Repower Shoalhaven
- Eurobodalla Shire Council – consultation and planning, infrastructure, leadership. Adaptation plan.
- 350Eurobodalla – research and community information on climate change mitigation and adaptation
- ZeroSE - Community
- Eurobodalla Natural History Society, Birds Australia, the Australian Plant Society, SAGE, Eurobodalla Walkers, Eurobodalla Botanic Gardens, South Coast Region Conservation Alliance, Sustaining All Life, Nature.net.au, the Australian Conservation Foundation, Climate Action Monaro – advocacy for native bush and forest, wildlife
- Bushfire Survivors for Climate Action, Australian Parents for Climate Action, Climate and Health Alliance, With Our Own Eyes Eurobodalla, Surf Beach Surgery, Refugee Action Collective Eurobodalla– social and human impact mitigation
- Coast Watchers, the Nature Coast Marine Group – coastal zone and aquaculture
- Farmers for Climate, NSW Farmers, Landcare, Borrowed Ground Market Garden – sustainable food production, local production and distribution
- Extinction Rebellion – special interests of young people
- Chambers of Commerce, Global Learning, Sportfirst Moruya, Southern Phone – business, tourism
- The Greens and the Australian Labor Party – policy and advocacy for people, employment and nature in balance

# Orphan Actions

- Actions for which no responsible body has been identified:
- E.g. Training and education
- Is there a group or organisation to advocate for better recycling and waste management?

# What did you think about the Forum?

Survey Monkey results:
