# Be part of the change

**Micro Energy Systems Australia (MESA) has forged a long-term partnership with the Southcoast Health and Sustainability Alliance (SHASA), a not-for-profit community organisation formed to improve the resilience of the community and achieve a low carbon economy.**

This unique synergy has provided the local community with access to low-cost, high-quality PV solar & storage systems whilst maintaining business integrity and reliable ongoing commitment.

The partnership has earned a reputation for honest advice, quality work practices and innovative solutions through a successful 5 year Solar Bulk Buy program and a

significant number of community projects achieved with grant funding. SHASA has also directed funding to installations and upgrades on community facilities to be heatwave and bushfire havens for the more vulnerable members of our community.

One of the more recent initiatives sponsored by the partnership is the Repurposing for Resilience [RfR] program, offering a local solution to the ever-increasing solar panel waste problem in the Eurobodalla & surrounding shires.

If you would like to learn more about this grass roots Initiative or become involved, please visit [www.rfreurobodalla.com.au](http://www.rfreurobodalla.com.au) and follow our Facebook page.

**For all of your renewable energy needs call 0410 790 616**
